We are on a mission to end cancer as a deadly disease...Tribun Health, a cutting-edge technology company has helped shape the future of cancer diagnostics by developing groundbreaking digital solutions for pathology.

We pioneered advanced AI technology to automatically extract relevant data from pathology slides, accelerate and improve image quantification for diagnostics, prognosis, and biomarker analysis. Today we are meeting many ambitious challenges to deliver solutions that have the potential to radically transform the way the cancer is diagnosed to offer a personalized treatment.

As a global leader, we are driven by developing the most valuable experiences for our customers (public hospitals and private companies around the world) and creating the best work environment for our team members. Customer satisfaction, innovation, patient impact and teamwork are at the core of our success. In this regard, Tribun Health has won the prestigious customer experience award "Best in KLAS" for Digital Pathology for 2022.

Tribun Health has a proven track record in digital health transformation and is growing very fast thanks also to its values. If you want to be part of the team, then join us as a Java Script React Developer (m/f). Reporting to the CTO, within a committed team and in a friendly atmosphere, you will take full part in the development and expansion project of Tribun Health. Your skills and your state of mind are the key to the company's success. Your main missions are the following:

- Technology watch and state of the art
- Co-writing user scenarios with the product owners
- Development of thin client layers in conjunction with the backend developers
- Participation in the writing of software tests and validation in connection with the testers
- Participation in the continuous improvement of team processes

To carry out these missions we are looking for the following skills:

- Good knowledge of frontend development: Javascript/HTML/CSS
- Significant level in ReactJS (minimum experience: 2 years on a project)
- Knowledge of RESTful API
- Knowledge of TypeScript

- Sensitive to UI/UX issues
- Ability to work in Agile teams

You have:

- Software engineer background
- 4 years minimum of experience in JavaScript development
- Fluent in English

What's in it for you?

- The opportunity to work with an international team with a high technical and scientific level.
- A start-up way of working
- Hybrid work (2 days of remote/week)
- Office located at the bottom of the Eiffel Tower 🗼
- An attractive package
