Tribun Health, AI-Powered Pathology - Paris, France (Hybrid)

Apply on [LinkedIn](#) or send your application to jrat@tribun.health

Tribun Health has been the leader in clinical decision-making solutions using digital pathology for over 15 years. Our mission ? Accelerate diagnosis, improve patient care so that cancer is no longer a fatal disease.

We pioneer advanced artificial intelligence technology that automatically extracts the most relevant data from pathology slides, accelerates and improves image quantification for diagnosis, prognosis and analysis biomarkers. Our products have been developed with the assistance and experience of pathologists from prestigious private, public and academic institutions around the world.

As a world leader, we are keen to meet the expectations of our customers (public hospitals, private laboratories and the pharmaceutical industry). Customer satisfaction, innovation, patient impact and teamwork are at the heart of our success. Tribun Health has also won the prestigious "Best in KLAS" customer experience award in digital pathology for 2022.

Tribun Health is accelerating its development, internationally and in France, and recruiting new talent. If you want to take on new challenges, join the Customer Experience team! Attached to the VP Customer Experience, within a committed team, you take full part in the development and expansion project of Tribun Health. Your skills and your state of mind are the actors of the success of the company.

Your missions will be the following:

- Make the link between the development teams and the deployment teams of our customer solutions, by being responsible for the production of new releases.
- Define the support client server architectures of our solutions.
- Dimension and validate the test environments for our solutions.
- Administer production servers in the Cloud.
- Ensure the performance and availability of our solutions, with regard to customer requirements and market developments.
- Bring its expertise to the after-sales, deployment and R&D teams.
- Provide technical expertise to teams for the continuous improvement of business processes.

In order to carry out these missions, we are looking for the following skills:

- Windows and Linux server administration.
- Experience maintaining a platform on AWS in operational condition.

Required Skills :

- At ease with a scripting language among Bash, python, PowerShell.
- Mastery of Docker and experience of administration of a Production cluster with Kubernetes.
- Automation: Use of an Infrastructure As Code tool (Terraform) of a Configuration Management tool (Ansible, Puppet, Chef).

- Knowledge of a continuous integration solution (Gitlab, Jenkins), a monitoring solution (Nagios, Prometheus, Datadog, Sensu, InfluxDB, Grafana).

Additional skills appreciated:

- Experience with IHE.
- Database administration (SQL Server, PostgreSQL, MySQL).
- Team work.
- Autonomy, organization, rigor.
- Capacity for analysis and synthesis.
- Oral and written expression of professional level in French and English.

You have :

- Initial computer training.
- 5 years minimum in the function.
- English proficiency.

We offer you :

- The opportunity to work with an international team with a high technical and scientific level.
- A start-up type work environment.
- Hybrid work (2 days of teleworking/week).
- Offices at the foot of the Eiffel Tower 😊
- An attractive package.
