

## **Software Engineer - Backend (Senior)**

**Classification:** FLSA Exempt

**Reports To:** Supervisor, Software Engineering

### **Apply Here: Software Engineer – Backend (Senior)**

Indica Labs is looking for a highly talented and experienced developer to complement the Halo Infrastructure team who will be responsible for contributing to leading-edge digital pathology software. This position is in an exciting and emerging area of medicine that is critical in various fields, including cancer treatment research, drug trials, and development. The developers who work with Indica Labs get to directly contribute to the advancement of these medical applications while working for a company that has ranked first in "Top Places To Work" by the Albuquerque Journal two years in a row. Indica Labs also offers excellent benefits, including 100% paid medical insurance, flexible work style (remote, in-office, hybrid), annual bonuses, and a fully vested 401(k) matching. Indica Labs has a relaxed work culture where a healthy work-life balance is valued!

The exceptional developer hired for this position can impact how digital pathology is conducted across the world and to be of assistance to a variety of medical fields including cancer treatment research. The successful candidate needs to demonstrate a proven track record of working in a highly dynamic distributed team and resolving complex issues in fast time with few issues using C#.

**Special note to candidates: This posting includes full-time, temporary, and limited term options.**

**At this time, only candidates in New Mexico will be considered.**

The Halo Infrastructure software development team is responsible for the following aspects of the application:

- Large backend feature development.
- Image viewing and analysis.
- Back-end technology such as C#, GraphQL, Entity Framework, ASP.NET Core, and MySQL.
- Large data set handling and manipulation.
- Debugging and addressing reported software bugs.
- Troubleshoot issues in complex, large-scale production deployments.
- Develop highly performant applications and services.
- and much more...

Minimum Qualifications:

- Bachelor's Degree in Computer Science (CS), Computer Engineering (CE), Electrical Engineering (EE), Math or related.
- At least 5-8 years Software development experience.
- Strong background in C#.
- Experience with Full-Stack development.
- Indica Labs is a Federal Contractor, so candidates within the United State should expect a requirement for full vaccination against COVID-19.

- Authorization to work in the United States, or appropriate authorization to work in the applicant's current home country (Indica Labs, Inc. does not sponsor work visas).

Indica Labs, Inc. is proud to be an Equal Employment Opportunity and Affirmative Action employer. We take pride in providing equal employment opportunities to all employees and applicants regardless of their race, color, creed, religion, gender, age, sexual orientation, national origin, disability, veteran status, or any other characteristic protected by state, federal, or local law. Additionally, it is standard company policy to provide reasonable accommodations to qualified individuals who have protected disabilities to the extent required by applicable laws. All candidates will be required to submit unofficial transcripts as a condition of application. Due to the nature of our business, and to meet United States Federal, State, and International requirements, final selected candidates must pass a background check for employment.
